EDUCATION

University of California, San Diego **La Jolla, CA**
Bachelor's of Science, Computer Science | GPA: 3.92 *September 2017 - June 2021*

Relevant Coursework:
Math 18: Linear Algebra | Math 20C: Multivariable Calculus
CSE 100: Advanced Data Structures | CSE 101: Design and Analysis of Algorithms
CSE 110: Software Engineering | CSE 132A: Database System Principles
CSE 150: Introduction to AI: Search and Reasoning

KEY SKILLS

Languages: Java, Python, Javascript, HTML/CSS, C, C++, MATLAB
Frameworks/Tools: ARM, React, MySQL, Splunk, Android

EXPERIENCE

American Express **New York City, NY**
Software Engineering Intern (Mobile SRE Team) *June 2019 - August 2019*

- Used Python to analyze and visualize traffic data from millions of mobile users across 10+ regions from Splunk logs to determine the effect of a force upgrade
- Integrated Dynatrace into the Android app (in Kotlin) to provide real user monitoring and report the availability/reliability of the system
- Developed a scoring matrix to categorize user traffic data and flag attack traffic from certain IPs that should be blocked

UC San Diego CSE Department **La Jolla, CA**
Tutor *September 2018 - present*

- Helped run CSE 11, the introduction computer science course, and CSE 30, Computer Organization and Systems Programming
- Provided 1 on 1 help for students during lab hours
- Graded exams, quizzes, and programming assignments

Lacework **Mountain View, CA**
Software Engineering Intern *June 2018 - September 2018*

- Developed an interface for inserting and retrieving contract information stored in different cloud databases (Snowflake, Amazon Aurora)
- Built an intuitive UI to allow customers to view their recent contract and usage history
- Used the Jira/Datadog APIs to create alert notifications when certain events are triggered
- Created an interface for converting JSON objects to parameterized MySQL statements

Boston University **Boston, MA**
Research *July 2016 - August 2016*

- Researched a novel circuit design to more efficiently convert AC to DC
- Used MATLAB/Simulink to simulate circuit configurations to test the accuracy of theoretical calculations and built circuits powered by Arduino to test the simulations
- Created/presented poster during a symposium to students and faculty
- Research paper has been published in the New Journal of Physics
